

# SiteWatch™ Mobile Surveillance Trailer

Portable, self-contained security solution designed for rapid deployment in any location.

Twenty20's SiteWatch Mobile is a trailer-mounted surveillance system ideal for short-term deployment situations, but rugged enough for long-term use in the field. This mobile solution can easily be relocated by a single person and quickly deployed in emergency situations. The SiteWatch Mobile is the perfect solution for temporary deployments with changing security needs.

## PORTABLE & SELF-POWERED UNITS FOR REMOTE SITES

The SiteWatch Mobile works in a variety of locations, but is designed for use in off-grid environments with no connectivity or power, so you can manage your remote operations from anywhere without costly investments in infrastructure. Plus, all Twenty20 security solutions record footage on-site 24/7 and push events to our web-based platform in real-time, so your team is notified when a potential threat arises.

## THE TWENTY20™ ADVANTAGE

Stand-alone systems operate with no power or connectivity

Rapid deployment solutions for remote sites

Integrated view of sites via browser-based dashboard

Real-time video insights and historical reports

AI-enabled software increases efficiency and reduces false alarms

## BENEFITS

- > Self-sufficient solar power with optional generator backup
- > Supports multiple cameras and ancillary equipment
- > Rugged steel construction withstands strong winds and severe weather
- > Optional voice down speaker plays audio to deter unwanted activity
- > Reduce theft and vandalism and keep your assets safe
- > Reduce costs by up to 50% over on-site security guards
- > Monitor 4x the area capable by a single security guard
- > Visibility to your sites from any computer, tablet or smartphone via our web-based platform
- > Actionable insights and historical reports available online
- > Set up automated push alerts to text or email systems
- > Quickly access event-specific footage remotely or stream live HD video
- > View one or hundreds of your sites within a single system

**APPLICATIONS**

**ENVIRONMENTALLY-  
SENSITIVE AREAS**

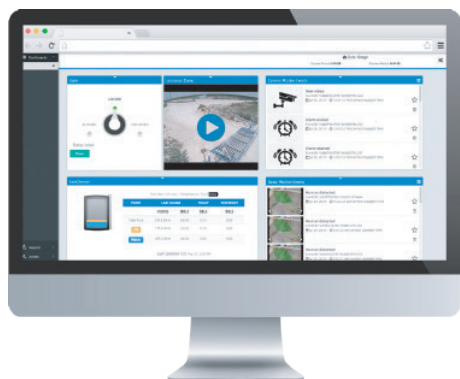

**UTILITY  
SUBSTATIONS**

**DISASTER  
RECOVERY**

**CONSTRUCTION  
SITES**

**PARKING  
LOTS**

**ONE PLATFORM. TOTAL CONTROL.**

The Twenty20 cloud platform gives you a single, integrated view into all your security, access control and automation operations at your remote sites and gives you real-time visibility and control over every aspect of your on-site operations.

- > All footage is stored in the cloud, not on a locally-stored device
- > Platform accessible via any web-enabled device: computer, tablet, phone
- > Control gates, camera systems and equipment online 24/7
- > View real-time video footage live
- > Access previously recorded events stored for up to 90 days
- > Delivers data-driven insights and reporting about your operations
- > Artificial Intelligence (AI) enables better management of voluminous data
- > AI enhances efficiency in identifying threats by decreasing false alarms

**ABOUT TWENTY20 SOLUTIONS**

Twenty20 Solutions will change the way you secure and optimize your operations across all of your remote sites. We are a global provider of automation and security technology, smart surveillance and access control solutions for both on and off-grid environments. We build intelligent technology into all our solutions, providing actionable data for real-time decision making.

Powered by AI, our technology solutions can analyze more video data than ever before and will change the way you interact with your security and automation systems. By bringing the most important events and insights to your attention, our technology is constantly at work, allowing you to focus on what matters most: your business.

**Security & Surveillance**

Solutions that give you peace of mind that your sites are secure so your team can focus on your business.

**Monitoring**

Real-time virtual protection against theft and vandalism that drastically lowers the cost of securing your business.

**Access Control**

Control who enters and exits your sites from any location for added security and minimize need for on-site personnel.

**Automation**

Gain total control over site activity to maximize productivity and efficiency with automated solutions.

**Business Intelligence**

Make data-driven decisions by leveraging data and analytics to gain a competitive advantage in your business.
